THE ORB

THE MARK AND THE ASSISTANT'S FACE

# 01

# The idea

One good day at a time: a sphere rising over a horizon, lit warm from below.

01 THE IDEA

# One good day at a time

Every day in Orby starts like a sunrise on a mid-century travel poster.

### The sky

The ground. Cloud and Haze, with a dawn wash at the top of every tab.

### The sphere

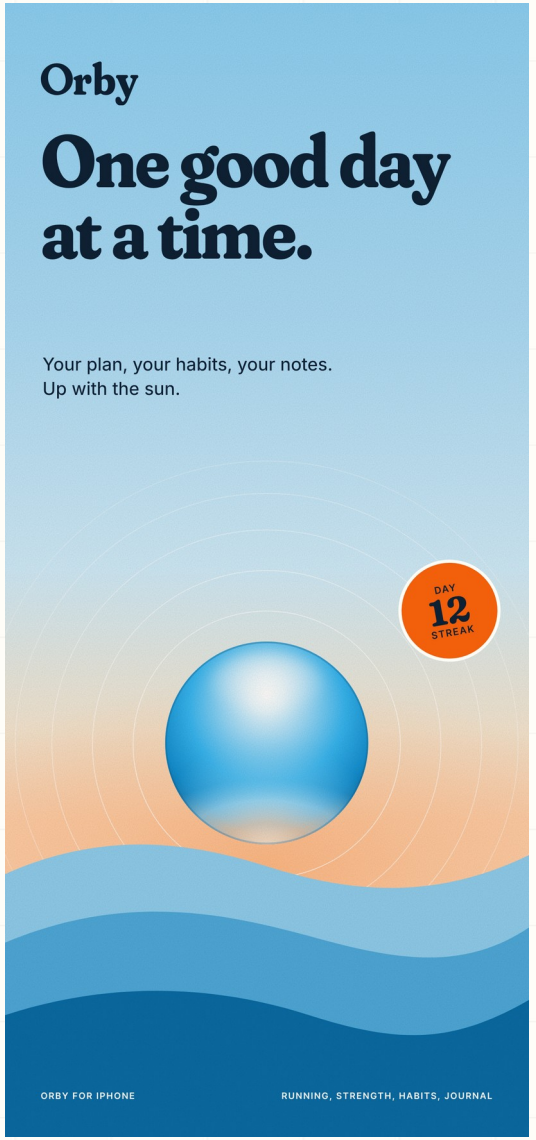

The Orb: the mark and the assistant's face, lit by a sunrise.

### The sun's light

Sunrise and Apricot. A now-mark and a glow, never a wall of color.

### The horizon

Flat hills, rings and grain on brand art; a half-sun on each tab title.

## THREE BRAND WORDS

### Optimistic

It assumes today can go well.

### Clear

One thing at a time, plainly.

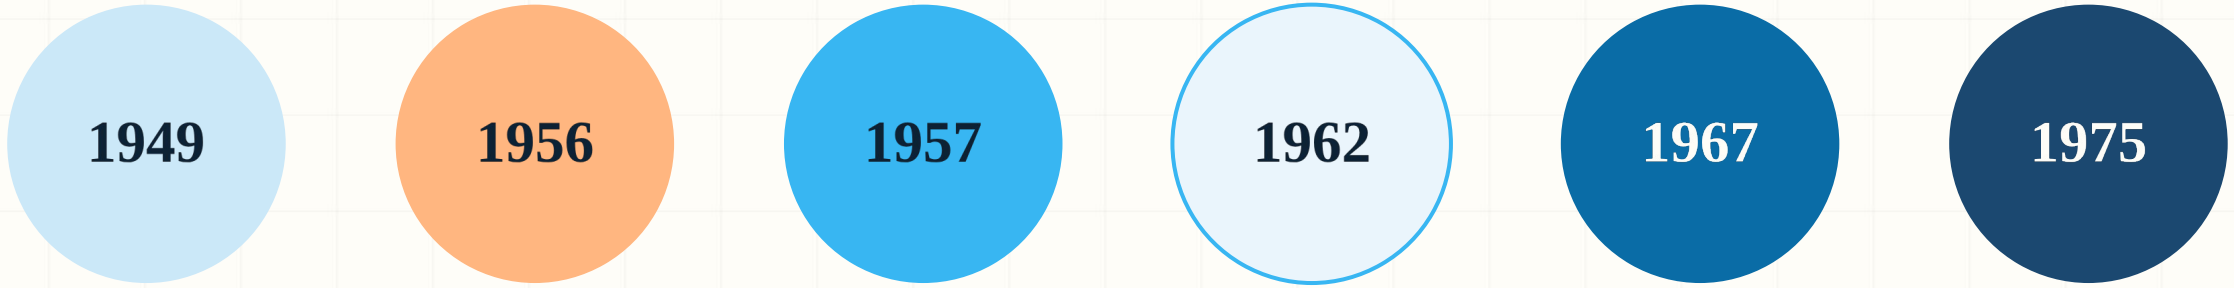

### Crafted

Made with care, like a good poster.

01 THE IDEA

# Mid-century futurist, made warm

Reference for the feel: https://www.area.tech/openai. Orby borrows the mood (sky-blue optimism, the circle, mid-century poise) and nothing else.

**EAMES**

Flat color fields in a strict grid.

**BRAUN**

Quiet bodies, one accent control.

**THE SPACE AGE**

The circle and the orbit.

**SAARINEN**

Continuous curves, one warm accent.

**EXPO 67 AND 70**

Domes and radial forms in public.

**THE NASA MANUAL**

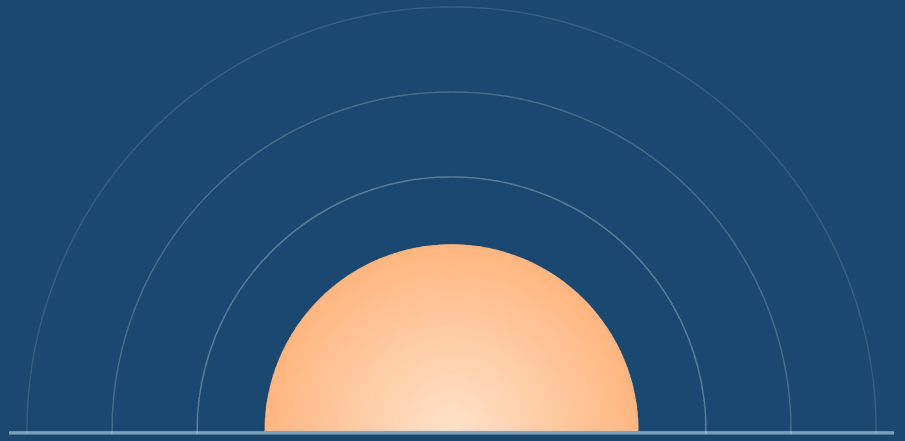

Numbers and do and don't pairs.

**WHAT WE LEAVE OUT**

Starbursts, rockets, atoms, neon, chrome, slate grounds and cockpit density. One sphere is a symbol; five shapes are wallpaper.

# 02

# Logo

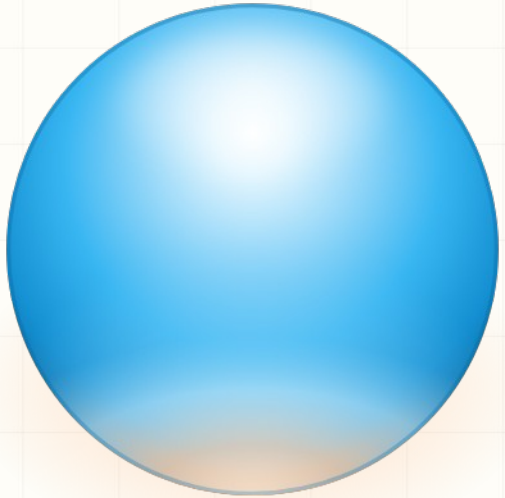

The Orb and the wordmark: the name and the mark are one idea.

02 LOGO

# The Orb: a sky-blue sphere lit by a sunrise

Blue first. A soft white highlight on top, a warm glow on the lower half, an edge all the way round. Never a band, never two-tone.

# The wordmark: Orby in Fraunces, as outlines

With four letters, the O carries the name. It echoes the Orb in shape and stays a letter, no darker than the rest.

### FACE

### STACKED

Orb 2 C across, centered on the ink width, 0.5 C above the b.

### ON DARK GROUNDS

Paper wordmark, same Orb. Paper on Twilight 9.36.

# 13

# The checklist and the brand agent

A change is done when every line is true, checked by the brand-guardian agent.

13 THE CHECKLIST

# Before you finish any UI change

Run all of it. Lines marked runtime need the app running; a rule that was not run is unverified, never passed.

- ◯ Every value from a token. check-brand.mjs adds no findings.
- ◯ Every pairing listed (3.2). pnpm test passes. Runtime: the audit.
- ◯ No Sky text on light, no white on Sky, no Sunrise text.
- ◯ At most 3 Sunrise marks, by priority; keylines 2 px or more. Runtime.
- ◯ One Orb, sized by tier: 48+, 28 to 47, under 28 flat. Runtime.
- ◯ One hero card and one glow. Runtime.
- ◯ Fraunces only in titles, sentences, static stats. No stray axes.
- ◯ Live numbers are Inter with tnum. Gauges print a readout.
- ◯ Radii 24, 18, 14, 12, pill, circle. Spacing on steps or a named exception.
- ◯ Captions: Inter Tight 600, caps, +0.14 em, one per card.
- ◯ Icons 1.75, round caps, the set's Progress glyph. No emoji.
- ◯ Copy: Orby, the assistant, American spelling, no em dashes.
- ◯ Tested at 200 percent, Reduce Motion, Increase Contrast. Runtime.
- ◯ Motion: transform, opacity and the named cases only.
- ◯ Partner marks unmodified, marked brand-ok: third-party.
- ◯ Identifiers unchanged. A screenshot matches its mockup.

13.1 THE BRAND AGENT

# The brand agent: the guide, as a reviewer

The brand-guardian agent (.claude/agents/brand-guardian.md) checks every change against the guide and the tokens.

1

### Ask before you build

"Which tokens does a new filter chip use?" It answers with values and the guide section.

2

### Run it on your diff

check-brand.mjs: colors, fonts, sizes, radii, tracking, spacing, motion, axes and copy.

3

### Give it a URL

audit.mjs checks pairings on real grounds, the Sunrise count, Orbs, sizes and tnum.

4

### Fix and re-run

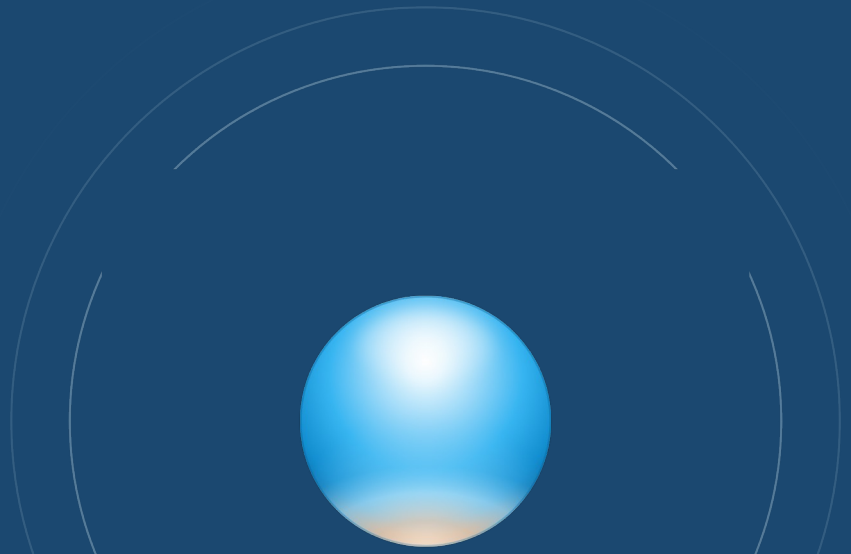

PASS needs every line; anything not run is listed as not verified.

**WHAT IT READS AND RUNS**

brand-guide.md, tokens.css, tokens.json and the diff. check-brand.mjs, check-styles.mjs, check-contrast.mjs when tokens change, and audit.mjs on the screens touched.

**WHAT IT NEVER DOES**

Edit files, invent a token, approve an unlisted pairing, rename the repo, packages, bundle id or storage keys, or pass a rule it could not check.
